Mobile is 18 a 20, and dull. The remor of a discovery of additional defalcations in the Trust Company to the amount of \$69,000, is untrue. The only new discovery that has been made is in relation to the manner in which Nicoll perpetrated some of his frauds. The ramor probably arose from the circumstance that a demand has been made on the Company for collateral security for a deposit of \$50,000. A rich citizen of Albany died and left by will to his grandchildren \$50,000, with directions that the Chancellor should deposit it in some safe institution for the benefit of tuese heirs, being minors. Since the Nicoil explosion in the Trust Company the father of the children, as their natural guardian, has demanded of the Company either the amount of the deposit or collateral security. The Company cannot, of course, give the latter in one case unless they do it in all, and this they cannot do. As this deposit was made for a stipulated number of years, it is doubtful if the father has any right to disturb it. This is, however, probably the foundation of the rumor allu-

An officer of one of the Agency Banks states that but little over two millions of the Government Loan was left when Mr. John Ward reached Washington. If so, there must have been a large amount taken lately at the Agencles, as within a fortnight, we have the best authority for knowing, the amount for sale by the Secretary was upward of five millions.

We trust our repeated cautions in relation to the Monmouth Bank have been attended to. We understand a small sum was presented for redemption to-day at the agency and the answer was, " No funds." Why is such a bank permitted to remain in existence by the New Jersey Legislature?

Counterfeit 5s on the Bank of Genesee, N. Y. have been detected, letter A, June 10, 1838, T. Carr, Pres't. The genuine are signed T. Cary, Pres't. We believe this is the only counterfelt ever issued on this Bank.

The Legislature of North Carolina having adjourned without having taken any definite action on the proposition of the private stockholders to wind up the State Bank, a resolution was passed previous to adjourning the general meeting of the stockholders on the 30th ult., leaving the subject open for the consideration of a future general meeting, and recommending to the President and Directors of the Bank to administer its affairs in the mean time with as liberal accommodation to the people of the State and indulgence to its debtors as may be consistent with the safety and interests of the Bank. The business of the week in Boston has been dull, but it is remarked that preparations are being made to build a large number of houses and stores. Rents are high and rising. Every convenient location is in ready demand, and capitalists are eagerly investing in real estate.

In the U. S. Senate, on Tuesday, Mr. Miller, from th Committee on the District of Columbia, reported a bill to extend the charters of the District Banks. The bill extends the charters to 1834, Congress reserving the right to alter. amend, modify, or repeal the said charters, or either of

The value of this description of Iron is very much influenced by assortments, owing to the entire cessation of demand for the sizes used for Nails, which are abundant in in market, while others are scarce, and assortments for other purposes made up with difficulty.
